**EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Claim 3 will be amended as follows:

On the last line, the period will be replaced with a comma, and the following text will be added: **wherein the incoming communication from the communication partner terminal is a request for voice communications between the communication terminal and the communication partner terminal.**

Claim 4 will be amended as follows:

On the last line, the period will be replaced with a comma, and the following text will be added: **wherein the incoming communication from the communication partner terminal is a request for voice communications between the communication terminal and the communication partner terminal.**

Claim 7 will be amended as follows:

On the last line, the period will be replaced with a comma, and the following text will be added: **wherein the incoming communication from the communication partner terminal is a request for voice communications between the communication terminal and the communication partner terminal.**

Claim 8 will be amended as follows:

On the last line, the period will be replaced with a comma, and the following text will be added: **wherein the incoming communication from the communication partner terminal is a request for voice communications between the communication terminal and the communication partner terminal.**

Claim 18 will be amended as follows:

On the last line, the period will be replaced with a comma, and the following text will be added: **wherein the incoming communication from the communication partner terminal is a request for voice communications between the communication terminal and the communication partner terminal.**

Claim 20 will be amended as follows:

On the last line, the period will be replaced with a comma, and the following text will be added: **wherein the incoming communication from the communication partner terminal is a request for voice communications between the communication terminal and the communication partner terminal.**

Claims 26-31 are canceled, as the language from these claims has been incorporated into the respective independent claims.

#### *Reasons for Allowance*

Claims 3-4, 7-14, 18 and 20-25 are allowed. The following is an examiner's statement of reasons for allowance:

Claims 3, 9, 10 and 21 are considered allowable since when reading the claims in light of the specification, as per MPEP §2111.01 or In re Sneed, 710 F.2d 1544, 1548, 218 USPQ 385, 388 (Fed. Cir. 1983), none of the references of record alone or in combination disclose or suggest the combination of limitations specified in independent claim 3, including “a communication terminal comprising: a video reproduction device configured to carry out a video reproduction” (supported at e.g. Fig. 1, elements 12-17, paras. [0028]-[0030]); “a communication device configured to carry out a communication” (supported at e.g. Fig. 1, element 11, paras. [0028]-[0030]); “and a reproduction-end-time acquisition device configured to acquire an end time of the video reproduction carried out by said video reproduction device” (supported at e.g. Fig. 1, element 18, paras. [0028]-[0030]); “wherein, in the event of an incoming communication from a communication partner terminal, external to the communication terminal, in the course of the video reproduction carried out by said video reproduction device, said communication partner terminal is informed of the end time of said video reproduction” (supported at e.g. Figs. 2 and 3, paras. [0031]-[0055]), “wherein the incoming communication from the communication partner terminal is a request for voice communications between the communication terminal and the communication partner terminal” (supported at e.g. Figs. 4 and 8, paras. [0035]), as specified in claim 3.

The closest art cited in the case includes Tidwell (Pat. No.: US 6,535,590), which discloses a telephony system for receiving telephone calls through a television set-top box, but does not disclose informing the caller of an end-time of a program. Chatterjee (Pub. No.: US 2007/0248221) discloses that a caller may be told that a user is busy, and that said user can specify a future time when said user will no longer be busy, but does not relate to a user

viewing a television program at the time of the call, and therefore does not disclose informing the caller of an end-time of a program. Schein (Pub. No.: US 2003/0208758) and Kusaba (Pat. No.: US 6,510,556) both disclose various means of obtaining a program end-time, but neither in relation to providing this end-time information to a caller trying to contact a user viewing the program to which said end-time is associated. Sin (Pat. No.: US 7,227,583) discloses that a system can *internally* convey information as to the end-time of a program, but does nothing to teach of conveying such information to an external party. Newly cited reference Swain (Pub. No.: US 2001/0047516) discloses that a user can remotely check the status of a recording, and thus is informed of an end-time of programs at a remote location. However, Swain does not disclose a request for voice communications. Therefore, it is the telephone call related element of the invention, wherein a caller, attempting to reach a user viewing a program, is informed of the end-time of said program, that Examiner finds to be novel.

Claims 4, 7-8, 11-14, 18, 20 and 22-25 are considered allowable for the same reasons stated above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
